

ABSTRACT OF THE DISCLOSURE

Pesticidal compositions for the control of household pests, such as cockroaches and ants, containing rosemary oil with and without one or more plant essential oils. In addition, the present invention is directed to synergistic pesticidal compositions containing rosemary oil with and without other plant essential oils. Furthermore, this invention is adopting a method for controlling household pests such as cockroaches and ants by applying a pesticidally-effective amount of the above pesticidal compositions to a locus where pest control is desired.
